

Zephyr Wool-Silk

This unique combination of natural fibers provides yarn that is lightweight and lustrous. Equal percentages of fine Merino wool and Chinese Tussah silk are joined to create a truly elegant yarn.

- 1 lb. cones
- 4/8 — approx. 1,120 yds./lb. (DK weight)
- 2/18 — approx. 5,040 yds./lb. (lace weight)
- 50% fine grade Merino wool
- 50% Chinese Tussah silk

Because wool and silk accept dyes differently, the fabric made from this yarn may have a slightly "tweedy" look in some shades.

Due to the difficulties inherent in dyeing wool-silk, some shades may be less resistant to fading in light and water than 100% wool. For this reason, we recommend that wool-silk garments not be exposed to natural or artificial light for prolonged periods and that they be dry-cleaned only. We cannot be held responsible for damages incurred as a result of any other cleaning or finishing method. *Weavers, please take note.*
